

Station Area Planning and Alignment Workshop

Wednesday, August 10

5:30-8:30 p.m.

Torah Day School Gym

1985 Lavista Road

We Want to Hear from You!

Please plan to attend our Station Area Planning and Alignment Workshop to learn more about the transit alternatives proposed by MARTA for the Clifton Corridor, a busy travel area between Buckhead/Lindbergh and Emory/Decatur. MARTA, in conjunction with the Clifton Corridor Transit Management Association (CCTMA), has developed three alternatives to alleviate congestion along the corridor. These transit alternatives involve connecting the Lindbergh Center and Avondale MARTA stations with either bus rapid transit, light rail, heavy rail, or combinations of transit technology. All alternatives provide service to the CDC and Emory University.

Doors will open at 5:30 p.m. A brief introduction and instructions for the workshop will be presented at 6 p.m. Then we will need your active input to plan station areas and alignment patterns. Tell your friends, co-workers, classmates, and neighbors! When you attend these sessions, you will become a transit planner, so come ready to work!
