#### 1.0 INTRODUCTION

The Metropolitan Atlanta Transit Authority is preparing an Environmental Impact Statement (EIS) for the proposed I-20 East Corridor. In accordance with the National Environmental Policy Act (NEPA), an EIS addresses the proposed development of new transit service. The I-20 East AA/DEIS will identify and summarize the transportation and environmental impacts, both positive and negative, associated with the implementation of new east-west transit service from downtown Atlanta to the Mall at Stonecrest in eastern DeKalb County. The study will seek to identify transit investments that would improve east-west mobility and accessibility to jobs and housing within the corridor, provide convenient and efficient transit service to accommodate the increasing transit demands within the corridor, and support corridor economic development and revitalization.

### 1.1 Purpose

The objective of this memo is to provide an overview of the methodology used to prepare the capital costs estimates for each of the "Tier 2" alternatives. It outlines the basis for preparing the capital cost estimates for the project. Additionally, it presents the current Federal Transit Administration (FTA) formats (Standard Cost Categories [SCC]).

The alternatives are described below.

| Name | Alignment Description  | Proposed Stations   |
|------|--|---|
| HRT1 | A new heavy rail transit (HRT) line would spur from the existing MARTA rail network just south of the Garnett station. From there, the alignment would extend south parallel to Windsor Street, then east along Glenwood Avenue/Fulton Street, before it would enter the I-20 right-of-way at Hill Street. From there, the alignment would extend east, on structure, in the center of the I-20 median. At Glenwood Avenue, the alignment would transition to the side of the interstate and run parallel to I-20 to the Mall at Stonecrest in eastern DeKalb County.  | Turner Field, Glenwood Park/BeltLine, Glenwood Avenue, Gresham Road, Candler Road, Wesley Chapel Road, Panola Road, Lithonia Industrial Boulevard, Mall at Stonecrest |
| LRT1 | A new light rail transit (LRT) line would operate in-street along Broad Street from Five Points Station to Garnett Station. It would then operate in an exclusive guideway south of Garnett Station and extend south parallel to Windsor Street, then east along Glenwood Avenue/Fulton Street, before it would enter the I-20 right-of-way at Hill Street. From there, the alignment would extend east, on structure, in the center of the I-20 median. At Glenwood Avenue, the alignment would transition to the side of the interstate and run parallel to I-20 to the Mall at Stonecrest in eastern DeKalb County. | Turner Field, Glenwood Park/BeltLine, Glenwood Avenue, Gresham Road, Candler Road, Wesley Chapel Road, Panola Road, Lithonia Industrial Boulevard, Mall at Stonecrest |
| BRT1 | A new bus rail transit (BRT) line would operate in-street along Broad Street from Five Points Station to Garnett Station. It would then operate in an exclusive guideway south of Garnett Station and extend south parallel to Windsor Street, then east along Glenwood Avenue/Fulton Street, before it would enter the I-20 right-of-way at Hill Street. From there, the alignment would extend east, on structure, in the center of the I-20 median. At Glenwood Avenue, the alignment would transition to the side of the interstate and run parallel to I-20 to the Mall at Stonecrest in eastern DeKalb County.   | Turner Field, Glenwood Park/BeltLine, Glenwood Avenue, Gresham Road, Candler Road, Wesley Chapel Road, Panola Road, Lithonia Industrial Boulevard, Mall at Stonecrest |

| LRT2 | A new light rail transit (LRT) line would originate at the North Avenue Station and operate in-street along North Avenue east to the proposed BeltLine alignment. It would follow the Beltline alignment south to I-20. It would then extend east in an exclusive guideway, on structure, in the center of the I-20 median. At Glenwood Avenue, the alignment would transition to the side of the interstate and run parallel to I-20 to the Mall at Stonecrest in eastern DeKalb County. | Glenwood Park/BeltLine, Glenwood<br>Avenue, Gresham Road, Candler<br>Road, Wesley Chapel Road,<br>Panola Road, Lithonia Industrial<br>Boulevard, Mall at Stonecrest          |
|------|---|--|
| HRT2 | A new heavy rail transit (HRT) line would spur from the existing MARTA rail network just west of the East Lake Station. The alignment would enter a tunnel within existing MARTA right-of-way and extend south to I-20. The alignment would then surface and run parallel to I-20 to the Mall at Stonecrest in eastern DeKalb County.   | Glenwood Avenue, Gresham Road,<br>Candler Road, Wesley Chapel<br>Road, Panola Road, Lithonia<br>Industrial Boulevard, Mall at<br>Stonecrest                                  |
| HRT3 | The existing heavy rail transit (HRT) Blue Line would be extended from the Indian Creek Station, south parallel to I-285, then east parallel to I-20 to the Mall at Stonecrest in eastern DeKalb County.  This alternative would also include bus rapid transit (BRT) service inside the Perimeter, originating at the Five Points Station, traveling south along surface streets to I-20, then operating in I-20 serving stations eastward to Candler Road.                              | HRT: Covington Highway, Wesley Chapel Road, Panola Road, Lithonia Industrial Boulevard, Mall at Stonecrest BRT: Moreland Avenue, Glenwood Avenue, Gresham Road, Candler Road |

## 2.0 FEDERAL TRANSIT ADMINISTRATION STANDARD COST CATEGORIES

In 2005, FTA implemented the SCCs to establish a consistent format for the reporting, estimating, and managing of capital costs for New Starts projects. The cost information gathered from projects across the country are developed into a database and become a cost estimating resource useful to FTA and the transit industry alike. The SCC Workbook is a project management tool, which is project-based as opposed to grant-based. Over the life of a project, the consistent format makes it easier to track, evaluate, and control cost change annually until the eventual submission of the Before and After Study or at project close-out and resolution of claims. Cost categories and units of measures utilize the FTA SCC format as defined by FTA.

#### 2.1 SCC's

The following table, as provided by FTA, lists the SCC's. Further detail is provided in appendix.

|              | ard Cost Categories for Capital Projects                              |
|--------------|---|
| DEFIN        | ITIONS  |
| (Rev.13, Jui | ne 1, 2010)   |
|              | EWAY & TRACK ELEMENTS (route miles)                                   |
| 10.01        | Guideway: At-grade exclusive right-of-way                             |
| 10.02        | Guideway: At-grade semi-exclusive (allows cross-traffic)              |
| 10.03        | Guideway: At-grade in mixed traffic                                   |
| 10.04        | Guideway: Aerial structure  |
| 10.05        | Guideway: Built-up fill   |
| 10.06        | Guideway: Underground cut & cover                                     |
| 10.07        | Guideway: Underground tunnel  |
| 10.08        | Guideway: Retained cut or fill  |
| 10.09        | Track: Direct fixation  |
| 10.10        | Track: Embedded   |
| 10.11        | Track: Ballasted  |
| 10.12        | Track: Special (switches, turnouts)                                   |
| 10.13        | Track: Vibration and noise dampening                                  |
| 20 STATI     | ONS, STOPS, TERMINALS, INTERMODAL (number)                            |
| 20.01        | At-grade station, stop, shelter, mall, terminal, platform             |
| 20.02        | Aerial station, stop, shelter, mall, terminal, platform               |
| 20.03        | Underground station, stop, shelter, mall, terminal, platform          |
| 20.04        | Other stations, landings, terminals: Intermodal, ferry, trolley, etc. |
| 20.05        | Joint development   |
| 20.06        | Automobile parking multi-story structure                              |
| 20.07        | Elevators, escalators   |
| 30 SUPP      | ORT FACILITIES: YARDS, SHOPS, ADMIN. BLDGS                            |

| 30.01    | Administration Building: Office, sales, storage, revenue counting     |
|----------|---|
| 30.02    | Light Maintenance Facility  |
| 30.03    | Heavy Maintenance Facility  |
| 30.04    | Storage or Maintenance of Way Building                                |
| 30.05    | Yard and Yard Track   |
| 40 SITEW | ORK & SPECIAL CONDITIONS  |
| 40.01    | Demolition, Clearing, Earthwork                                       |
| 40.02    | Site Utilities, Utility Relocation                                    |
| 40.03    | Haz. mat'l, contam'd soil removal/mitigation, ground water treatments |
| 40.04    | Environmental mitigation, e.g. wetlands, historic/archeologic, parks  |
| 40.05    | Site structures including retaining walls, sound walls                |
| 40.06    | Pedestrian / bike access and accommodation, landscaping               |
| 40.07    | Automobile, bus, van accessways including roads, parking lots         |
| 40.08    | Temporary Facilities and other indirect costs during construction     |
| 50 SYST  | EMS   |
| 50.01    | Train control and signals   |
| 50.02    | Traffic signals and crossing protection                               |
| 50.03    | Traction power supply: substations                                    |
| 50.04    | Traction power distribution: catenary and third rail                  |
| 50.05    | Communications  |
| 50.06    | Fare collection system and equipment                                  |
| 50.07    | Central Control   |
| Construc | tion Subtotal (10 - 50)   |
| 60 ROW,  | LAND, EXISTING IMPROVEMENTS   |
| 60.01    | Purchase or lease of real estate                                      |
| 60.02    | Relocation of existing households and businesses                      |
| 70 VEHIC | CLES (number)   |
| 70.01    | Light Rail  |
| 70.02    | Heavy Rail  |
| 70.03    | Commuter Rail   |
| 70.04    | Bus   |
| 70.05    | Other   |
| 70.06    | Non-revenue vehicles  |
| 70.07    | Spare parts   |
| 80 PROF  | ESSIONAL SERVICES (applies to Cats. 10-50)                            |
| 80.01    | Preliminary Engineering   |
| 80.02    | Final Design  |
| 80.03    | Project Management for Design and Construction                        |
| 80.04    | Construction Administration & Management                              |
| 80.05    | Professional Liability and other Non-Construction Insurance           |
| 80.06    | Legal; Permits; Review Fees by other agencies, cities, etc.           |
| 80.07    | Surveys, Testing, Investigation, Inspection                           |
| 80.08    | Start up  |
| Subtotal | (10 - 80)   |

| 90 UNALLOCATED CONTINGENCY |  |
|----------------------------|--|
| Subtotal (10 - 90)         |  |
| 100 FINANCE CHARGES        |  |

**Total Project Cost (10 - 100)** 

#### 2.2 Professional Services

Professional Services for HRT and LRT alternatives were assumed to be the same as the design, construction and installation of the systems are similar. The Professional Services for the BRT alternatives are different than those of the HRT and LRT due to the difference between train systems and bus systems.

#### 2.3 Contingencies

Two types of contingencies are included in the SCC 90 Category. Allocated contingency is based on the type of construction and the risk potential for each category. For example, the construction allocated contingency is 10%; design services is 5% and right-of-way acquisition is 25%. These allocated contingency applications are consistent for HRT, LRT, and BRT alternatives.

Unallocated contingency is applied to the project subtotal. Unallocated contingency is 5% for all of the alternatives and is called the Project Reserve.

#### 3.0 METHODOLOGY AND ASSUMPTIONS

## 3.1 Overview of Approach

The general steps taken to calculate and present costs for each alternative included:

- Develop unit costs for each SCC item listed above, as applicable to this project.
  Unit costs are portrayed as linear feet, route feet, each, or a percentage of
  another SCC or group of SCC's. These costs and units are presented in tabs
  entitled "HRT Unit Costs", "LRT Unit Costs", and "BRT Unit Costs".
- Develop the quantity of each SCC required for each alternative. Quantities are based upon a conceptual level of engineering identifying at-grade, aerial, cut and cover, tunnel, and retained cut and cover sections. Also identified were support facilities, and vehicles required. The quantities are identified in the attached workbook and appendix as tabs titled:
  - o HRT1
  - o LRT1
  - o BRT1
  - o LRT2
  - o HRT2
  - o HRT3
- Multiply the unit costs with quantities required to arrive at the cost for each SCC for each alternative (Top-Down or Parametric estimate approach)
- Sum the costs for each SCC for each alternative to arrive at the cost for each alternative, as presented within the "Build Alts Summary" tab of the workbook

#### 3.2 References

Calculation of cost estimates relied on recent AECOM experience in providing cost estimating and construction management services for various transit and other capital projects across the United States.

Cost estimating for this project was informed by recent experience with the following projects or clients

- Dulles Metro Rail project
- Ansalado (Train Control costs only)
- CCLRT (Minneapolis area contractor cost data)

- Columbia Pike (Arlington, VA Independent Estimate 2011)
- Atlanta Streetcar Independent Estimate 2011

#### 3.3 Cost Prices Adjustment to Atlanta

Regardless of source, all costs were adjusted to Atlanta cost indexes as R.S. Means. For example, the conversion factor for Atlanta using Washington Metro area City Cost Indexes as published by R.S. Means is 0.9631. Atlanta's City Cost Index is 88.8 while Fairfax County in Virginia is 92.2.

#### 3.4 Escalation

All cost estimates are reported in constant year 2011 dollars. The escalation factor took into account the construction market and estimated increases in the cost of labor, materials, and fuel over the duration of the project. The FTA recommends an escalation of three percent per year, compounded. This method applied for the duration of the project, and for both the design and construction phases.

Unit prices derived from past bids for similar projects or "Means Building Construction Cost Data" were adjusted to match current cost of materials and services. Some unit prices such as direct fixation and ballasted track items from past project estimates were escalated. Other costs were adjusted using "Cost Indexes" provided by Engineering News Record (ENR). Additional adjustments were made to suit labor costs appropriate for the Atlanta region. Three percent escalation was utilized in this estimate.

#### 3.5 Other Assumptions

In preparing the capital cost estimates, other assumptions and methodologies include:

- Right of Way and station costs are not included
- Vehicle costs are not included for HRT alternatives
- Support facilities are deemed necessary only for LRT alternatives
- All track costs are for double track, unless noted
- Connection costs to the existing HRT included in contingency
- All stations are of "Spartan" design and do not include parking
- No premium time on labor costs included (unless noted; see 40.08)
- Adequate experienced craft labor is available
- Normal productivity rates as historically experienced utilized
- Compatible trade agreements exist in the region
- No strike impacts will be experienced by the project

- There are sufficient experienced contractors available to perform said work
- Normal Metro Atlanta area weather impacts to constructions schedule
- Existing state of the art construction technology will be utilized
- Assumes cooperation between stakeholders

## 4.0 ESTIMATE LIMITATIONS

A reoccurring issue in the estimation of capital cost during the conceptual design phase of a project is the evaluation and treatment of uncertainty. Uncertainty can result in a "difference" between the estimated cost of a project as defined during the concept phase and the actual cost of the project that is ultimately implemented. Four potential sources of uncertainty are generally recognized. These are:

- Changes in project scope
- · Changes in design or operating standards
- Incorrect unit cost/quantity assumptions
- Unforeseen issues in implementation

## 5.0 CAPITAL COST ESTIMATING TABLES

The following tables include the findings of the capital cost estimates for each of the alternatives and additional detail regarding the calculations. An Excel file is also provided in electronic format further revealing the formulas and calculations for cells within the spreadsheets.

#### I-20 East

#### Tier 2 Alternatives

## Preliminary Order of Magnitude Capital Cost Estimates
